

TECHNICAL DATA SHEET

BACTERCIDE – BROAD SPECTRUM DISINFECTANT FOR ANIMAL AND LIVESTOCK INDUSTRY

An APVMA registered product formulated to provide high level disinfection for floors, walls, benches, equipment and fittings in hatcheries, sheds, stables, piggeries, dairies, yards, stalls or anywhere that animals are treated or handled.

Description – a clear pale non-viscous liquid with a slight musky odour.

FEATURES:

- Assured Viability
- Broad Range Disinfectant
- Safe For All Surfaces
- Animal Safe
- Stabilised formula
- Concentrated

BENEFITS:

- Has passed the stringent investigation procedure of the Australian National Registration Authority and is approved for use as a veterinary chemical in all area states.
- Is effective over a wide range of bacteria, fungi, protozoa, viruses and spores.
- Can be used on all plastic, rubber and stainless steel appliances. When used as directed Bactercide will not cause corrosion on copper, brass, zinc, tin, steel or stainless steel.
- No withholding period. Animals can be returned to treated areas as soon as Bactercide is absorbed or dry.
- Is buffered and stabilised at pH6.0. Bactercide has a long shelf life and maintains its viable disinfectant power for longer than normal glutaraldehyde solutions.
- Bactercide is provided as a concentrate and should be diluted 1:100 parts with water for most usage purposes. Will maintain its stability and potency for 7 days after dilution.

APPLICATIONS:

- Used to sanitise livestock housing, poultry sheds, walls and floors and processing equipment and conveyors.
- Used to sanitise incubators, hatchers and egg-handling rooms to prevent early chick mortality from microbial contamination.
- Utilised to disinfect veterinary surgical tools and rubber or plastic apparatus that cannot withstand heat.

SAFETY INFORMATION:

- Keep out of reach of children
- Avoid contact with skin & eyes
- Harmful if swallowed
- Read Material Safety Data Sheet before use

DIRECTIONS:

- Remove all portable equipment, litter and manure
- Thoroughly clean all surfaces before sanitising. Ensure that contact is made with all surfaces that require disinfection
- Dilute product 1:100 (1 part Bactercide to 100 parts water) may be applied to surfaces by foaming, pressure spraying, washing, recirculation or immersion.
- Allow product to dry or absorb before returning animals to treated areas.
- Bactercide will remain active on contact surfaces for 5-7 days.
