COMMAND

A NEW CONCEPT IN WASHING EFFICIENCY

Formulated for fast and efficient laundering of all fabrics in cold or hot water in both commercial and home laundries.

Description - A free flowing blue powder with fresh lemon fragrance.

FEATURES

A new concept in laundry powders. Formulated using the latest knowledge of world trends. Command has many features, which distinguish it from the well known "puffed" powders.

More cleaning power - through the use of more powerful cleaning and penetrating compounds, which cannot be incorporated into "puffed" powders.

Better grease cutting power – by the incorporation of more sophisticated emulsifiers.

More thorough rinsing – because of more liberal use of specialised rinse aids. This ensures no detergent residues remain to harden fabrics and cause skin irritations.

Brighter wash – achieved by addition of substantive ultra-violet absorbers and optical brighteners. These increase the brightness of the fabric with successive washes.

Better hard water tolerance – special formula is unaffected by hard water and performs efficiently without the need of any softening agents.

Ideal for grey water systems.

At recommended maximum dosage:

Phosphorus levels:	50gm in top loader	Phosphorus (P) = 3.5 gm
	30gm in front loader	Phosphorus (P) = 2.1 gm
Sodium Levels:	50gm in top loader	Sodium (Na) = 115mg/L
	30gm in front loader	Sodium (Na) = 138mg/L

Based on 150 litres of water per wash in top loader and 75 litres of water per wash in front loader.

DIRECTIONS FOR USE:

Recommended usage:	Top loaders	40 - 50 grams per full load
	Front loaders	25 - 30 grams per full load

14 Sandpiper Close, KOORAGANG
BOX 150 Hunter Region Mail Centre NSW 2310
