

OUTSTANDING TIMBER CONDITIONING LOTION AND STAINLESS STEEL POLISH

Formulated to clean, polish and protect – laminated, stainless steel and natural wood furniture.

DESCRIPTION - White creamy lotion

ADVANTAGES

MASTER TOUCH IS CONCENTRATED - Full of natural, deep penetrating oils and silicone to feed wood surfaces and keep them looking new, year after year.

MASTER TOUCH IS CONVENIENT - Can be used effectively on light or dark timber surfaces – laminated, solid or veneer – enamel – vinyl – leather – countertops and metal appliances. Very effective for auto interiors and chrome fittings.

MASTER TOUCH IS SIMPLE TO USE - Makes furniture cleaning easy. Super siliconising effect allows for easy spreading and easier buffing. Leaves a deep protective lustre. Dirt won't stick - dust won't settle - smudges wipe away.

MASTER TOUCH IS ECONOMICAL - Just a small spray down the centre of any area to be treated is easily spread out to cover a wide area.

REMEMBER:

- Master Touch is not a wax coating that makes the surface look artificially shiny.
- Master Touch is a luxurious, penetrating, conditioning emulsion that polishes and nourishes as it cleans leaving a deep, natural, 'cared for' lustre.

DIRECTION FOR USE:

Spray small amount onto area to be treated and spread evenly. Buff to high lustre with clean, dry cloth.

For problem areas, a small amount of Master Touch may be put directly on to a cloth and rubbed directly into the surface.
