

TECHNICAL DATA SHEET

Command - Laundry Washing Powder

Formulated for fast and efficient laundering of all fabrics in cold or hot water in both commercial and home laundries.

FEATURES:

- More cleaning power
- Better grease cutting power
- More thorough rinsing
- Brighter wash
- Better hard water tolerance

BENEFITS:

- Through the use of more powerful cleaning and penetrating compounds, which cannot be incorporated into “puffed” powders.
- By the incorporation of more sophisticated emulsifiers.
- Because of more liberal use of specialised rinse aids. This ensures no detergent residues remain to harden fabrics and cause skin irritations.
- Achieved by addition of substantive ultra-violet absorbers and optical brighteners. These increase the brightness of the fabric with successive washes.
- Special formula is unaffected by hard water and performs efficiently without the need of any softening agents.

IDEAL FOR GREY WATER SYSTEMS:

At recommended maximum dosage:

Phosphorus levels:	50gm in top loader	Phosphorus (P) = 3.5gm
	30gm in front loader	Phosphorus (P) = 2.1gm
Sodium levels:	50gm in top loader	Sodium (Na) = 115mg/L
	30gm in front loader	Sodium (Na) = 138mg/L

Based on 150 litres of water per wash in top loader and 75 litres of water per wash in front loader.

APPLICATIONS:

Recommended usage: Top loaders – 40-50gm per full load
Front loaders – 25-30gm per full load

SAFETY INFORMATION:

- Keep out of reach of children.
- Avoid contact with eyes.
- Read Material Safety Data Sheet before use.

Command is available in:
