

## CONCENTRATED FABRIC SOFTENER AND CONDITIONER

***For complete bacteriostatic softening and anti static effect on both natural and synthetic fabrics.***

Formulated to effectively soften, condition and sterilise all types of fabric during laundry processing and leave a lasting fresh fragrance.

### FEATURES

FABRICON is concentrated - small dosages achieve maximum results.

FABRICON contains super softening agents that impart a "baby soft" feel to fabric.

FABRICON reduces irritant properties caused by fabric roughness or insufficient rinsing.

FABRICON makes ironing easier and reduces static "fly away".

FABRICON is a powerful germicide giving complete protection at recommended concentrations.

FABRICON is ready to use - needs no pre-mixing - is readily soluble in water.

FABRICON is the ideal rinse additive for woollens, towels, blankets, etc., - or any fabric where the above mentioned results are desired.

### DIRECTIONS FOR USE:

FABRICON should be added to the final rinse cycle at a rate of 30 mls per 5 kg wash.
